

List 30 **ELECTRAIL COLOUR SLIDES** List 30  
 February 2009 February 2009  
 Electric Railway Society, 17 Catherine Drive, SUTTON COLDFIELD, England, B73 6AX.

ELECTRAIL is a range of colour slides depicting tramcars in Britain and overseas, electric trains, and coastal pleasure steamers – especially those that connected with electrified railway routes such as along the Clyde Estuary or along the South Coast of England. The slides are 35mm colour images generally mounted in plastic mounts measuring 2” x 2”. A very few of our earliest views are in card mounts of the same size. It is now becoming difficult to find photographic labs that are capable of producing these copy slides in quite large numbers at a reasonable cost and as a result the stocks of most of the slides contained in this list are becoming low and it will be impossible to obtain more copies of many of them. Where stocks are particularly low this is indicated in the list.

UK orders. Please send to address at top of this page. Each slide costs 40p and cheques should be made payable to “Electric Railway Society”. Orders sent to UK addresses are post free.

Overseas orders. Slides cost 40p each. The cost of processing cheques drawn on an overseas bank is prohibitive but cheques drawn on a UK bank are accepted. An inexpensive means of payment from the nations using the Euro, the US \$, or the Canadian \$ is to enclose pay for the order using € US\$ or Can \$ currency notes. Please do not use coins since these can go missing in the post. We have never lost notes! Where your order is too small for you to use notes something else can usually be arranged such as an exchange of slides for local transport timetables etc.

### CLYDE ESTUARY VIEWS

#### THE BURNS LAIRD LINE

This line once operated overnight passenger sailings to several destinations in Ireland from Broomielaw (and adjacent quays) in the heart of Glasgow, and freight sailings from the docks. Gracious very comfortable cabins were provided on the flagship run to Belfast and adequate facilities for sailings to Dublin and Londonderry, among other destinations.

- 3490 ROYAL SCOTSMAN One of a pair of boats that shared the prestigious Belfast sailings seen  
at Broomielaw on 27 September 1965. The Belfast service succumbed to new short ferry  
routes in 1967. Today a large proportion of travellers between the cities fly.
